Education

BSc Hons in Computer Science with AI (Ongoing)

Coventry University

High School (3.30 GPA, 2025)

Science: Khwopa Secondary School, Bhaktapur, Nepal

Projects

"Kaam Paryo"

(Hackathon Project)

- Developed a hyperlocal task based app using NodeJS and MongoDB, to showcase in hackathon conducted by 100xHackathon.

[Github](#)

"Babu : Desktop Assistant"

(Exhibition Project)

- Developed CLI based desktop assistant using Python to showcase in TechSense of Softwarica in partnership with Institute Of Analytics (IOA).

[Github](#)

"TalentKhoj"

(Academic Project)

- Developed a concurrent talent acquisition and career marketplace platform using Flask, MySQL, and JavaScript, featuring role-based access control, secure sessions, and automatic resume optimization.

[Github](#)

"AnonyVox"

(Personal Project)

- Developed a real-time, low-latency desktop voice changer using Python, PyTorch, and CUDA, combining Retrieval-based Voice Conversion (RVC) with custom DSP audio effects.

[Github](#)

"Bahun-D Run Game "

(Exhibition Project)

- Developed a 3D running game as a team project with exciting challenges as exhibition project using C#, Blender and Unity to showcase in annual exhibition of Khwopa Secondary School.

[Github](#)

"New Holy"

(Freelance Project)

- Built a prototype model and developed dynamic community web app from scratch as a team project using Figma, JavaScript, Nodejs, Express and MongoDB.
